PROFILE

Enthusiastic MERN Stack Developer with hands-on experience in building dynamic web applications using MongoDB, Express.js, React.js, and Node.js. Adept at leveraging modern development tools and practices to deliver scalable, responsive solutions, with a strong commitment to continuous learning and team collaboration.

SKILLS

• React.js • Node.js • Express.js • Bootstrap • Material UI • JavaScript • TypeScript • HTML • CSS
• MongoDB • GitHub • Angular • Redux • Restful APIs • Git • Firebase • Postman • Insomnia

EXPERIENCE

Luminar Technolab

Kochi, India

MERN Stack Developer Intern

Dec 2023 - Jun 2024

- Developed responsive web applications, ensuring cross-browser compatibility and optimized performance.
- Collaborated with the development team to design and implement RESTful APIs for efficient data exchange.

PROJECTS

Inventory Management Web-App

- This project focuses on creating a responsive web application for efficient inventory management. It helps businesses of all sizes track and manage their inventory in real-time. Key features include real-time tracking, detailed reporting and analytics, a user-friendly interface, and multi-device accessibility.
- The technologies used are React.js, Node.js, Express.js, and MongoDB for the database.

Project Fair Website

- This platform enables the presentation of your web projects, featuring dedicated sections for both display websites and project page websites.
- The technologies employed include React.js, Node.js, Express.js and MongoDB as the database

Youtube Media Player Website

- Built a media player using React and JSON Server, featuring YouTube video embedding via URLs. Implemented video categorization, drag-and-drop functionality for rearranging and deleting videos, and smooth user interactions.
- Integrated user authentication and playlist management, allowing users to create, edit, and organize their own video playlists while securely managing personal preferences.
